SUMMARY

Full-Stack Developer with 6+ years of experience building web applications with Java, React, and TypeScript. Worked on core banking systems at Sberbank and independent products. Comfortable with microservice architectures, message brokers, and modern frontend frameworks. Value clean code, solid engineering practices and clear communication within cross-functional teams.

WORK EXPERIENCE

Unallocated Metal Accounts (Sberbank)

Built the web platform for a product that attracted 450K+ new accounts and RUB 46 bn in investments in 2025 alone. Built on Spring Microservices with Kafka on OpenShift. Responsible for the entire customer-facing web frontend consisting of 5 micro-frontend projects, fully rewritten for the new design system. Handled both legacy maintenance and integration of new technologies aligned with fintech trends. 14-person cross-functional team including mobile developers, analysts, QA, and designers.

Cash Operations (Sberbank)

Transferred after an internal interview. Developed backend cash ordering, valuables management, and branch operations tracking as part of the core banking system.

Senior Development Engineer - Bell Integrator

Apr 2024 – Present

- Implemented PII masking for logging across microservices
- Integrated an AI coding agent using MCP
- Built new service integrations via Kafka
- Rewrote 4 micro-frontend modules for the design system migration
- Published and maintained a shared UI library in the internal package registry
- Configured OpenShift deployments and local stub environments for frontend-backend development
- Set up Allure TestOps for automated test reporting
- Led acceptance testing and release management
- Conducted code reviews across Java and React codebases; performed refactoring across Java, Spring, React, and TypeScript
- Investigated production bugs through log analysis and customer reports

Full-Stack Developer - Shark IT Company

Mar 2019

- Full-cycle application development from greenfield projects to maintaining existing solutions; primary stack: Spring Boot and React/Next.js
- System architecture design and end-to-end technical implementation for a news publishing platform serving multiple media outlets
- Full-stack development of user and admin panels with interactive media features: widgets, short-form video, content sliders
- Real-time messaging and reader-to-publisher communication module
- Leading a team of developers
- Payment processing integration (YooKassa) and ModulKassa (fiscal hardware compliance)
- Cloud deployment and infrastructure on Yandex Cloud
- Custom handwritten text recognition pipeline using PostgreSQL and AWS S3
- Push notification system for content updates
- Legacy code maintenance and incremental modernization

EDUCATION

2018 – 2022 Bachelor's Degree, System and Applied Software Engineering @ **ITMO University**

SKILLS

Backend	Java, Spring Boot, Spring Microservices, Kafka, RabbitMQ, Redis, MongoDB, SQL, REST, WebSocket, JWT, Firebase, FCM
Frontend	React, Vue.js, Nuxt, Next.js, TypeScript, Vite, TailwindCSS, SCSS, Bootstrap
DevOps	Docker, Docker Compose, Kubernetes, OpenShift, Nginx, Unix, Git, Maven
Testing	TDD, JUnit, Allure TestOps
Languages	Russian (Native), English (Fluent)
